

Testimonials

"It is a very good program and we saw much improvement since they started working with my husband. Neuropraxis made us feel included and informed in every step of the way. The whole team are knowledgeable, patient, compassionate, which made it comforting to work with them".

DIANA MARCH / PARTICIPANT 'S WIFE

"I have used NeuroPraxis for complex TBI treatment and case management for three years. Their interdisciplinary therapist team and state of the art TBI clinical expertise have benefited my referred patients' lives extensively. NeuroPraxis is an excellent treatment resource for any complex TBI case".

STAN SMITH, L.N.F.A. / SENIOR VICE PRESIDENT / PARADIGM SPECIALTY NETWORKS

"I think the world of NeuroPraxis. My patient really liked the care he received. Their influence in the case provided a huge difference in the quality of his life. I will refer to them again".

SUE COLEMAN, R.N. B.S.N, C.C.M. / NURSE CASE MANAGER

"As a dedicated patient advocate for 20 years, I believe in the quality and caring work of NeuroPraxis in helping rehabilitate brain injury patients. I have referred to and will continue to refer TBI patients to them".

ABOUT NEUROPRAXIS

NEUROPRAXIS is a cutting-edge rehabilitation program that provides comprehensive and individualized treatments to adults and adolescents with brain injury or spinal cord injury. Our interdisciplinary staff successfully incorporates technological advancements and innovative rehabilitation techniques to help clients overcome their TBI and/or SCI - related physical, emotional, and social challenges.

NeuroPraxis believes that people are the most valuable part of any recovery journey, and we strive to create possibilities to maximize client's independence, regain what was lost, and thrive for years to come.

WHY NEUROPRAXIS

- 01** A trusted partner in providing excellent neurorehabilitation program at home dedicated to healing and finding solutions to the most challenging cases.
- 02** Proven treatment programs with excellent success rate in helping people find their own normal and thrive beyond care.
- 03** Empowered rehabilitation delivered at home for a successful skill translation and better outcomes.
- 04** Innovative technology and care with a commitment to heal with therapy accessible from anywhere.
- 05** Proactive care that uses a 360 - degree perspective to achieve goals while in one's own environment.

OUTCOMES

Based on a survey of 20 Neuropraxis participants in 2021.

90% of those surveyed reported substantial improvements in attention, concentration, and depression.

95% of surveyed clients reported substantial improvements in memory, pain, headaches, self-awareness, and social contact with friends.

100% of surveyed clients who had completed the home and community reintegration program reported vast improvements in anxiety, fatigue, and sensitivity to mild symptoms.

PROGRAMS

Home and Community

The individualized, outcome-based therapy program delivered in the client's home and community. Focused on maximizing function and returning to their role within the family and community.

In-Home Supported Living

Long-term care, in their own home, that empowers to live life with continued independence for as long as possible.

Apartment Living

A personalized program at lower levels of supervision focused on learning independent life skills necessary for years to come.

RebuildU Program

An online community providing education and peer support after traumatic brain injury.

Day Treatment at Home

An intensive structured program conducted in one's own environment, which increases the success rate of skill translation.
